
Enhouse Systems Acquires CellVision AS

Acquisition Expands Enhouse's Portfolio of Network Operator Solutions

Markham, Ontario; Oslo, Norway – March 4, 2016 – Enhouse Systems Limited (TSX:ESL) announced today it has acquired CellVision AS.

Headquartered in Oslo, Norway, CellVision enables spatial intelligence and visual dashboard analytics for network operators. The company's mBOSS product line includes a suite of applications that integrates with data sources in the telecommunications service provider's operating environment, including OSS and BSS systems, geographic information systems (GIS), coverage planning, trouble ticketing, fault management, CRM, probes, configuration management systems, element management systems and more, and delivers a holistic operating view of the network. CellVision's solutions visualize network impact on customer experience and deliver network operations efficiencies in handling customer complaints, customer care and mobile coverage marketing.

"CellVision extends our capabilities in GIS, enabling real time analytics and visualization dashboards, especially for mobile network operators but can also be extended to other fixed line converged operators and utilities," said Sunil Diaz, General Manager, Enhouse Networks. "This acquisition helps Enhouse address an emerging need among network operators for improved customer experience and expectation management, which are increasingly important for incumbent as well as competitive mobile service providers. We are pleased to welcome CellVision's customers and employees to our organization."

About Enhouse Systems Limited

Enhouse Systems Limited is a leading global provider of enterprise software solutions serving a variety of vertical markets. Its strategy is to build a more diverse enterprise software company through strategic acquisitions and managed growth within its business sectors: Contact Center, Networks (OSS/BSS) and Transportation/Public Safety.
