

FIRST QUARTER ENDED  
JANUARY 31, 2019

**Enghouse Systems**

Software engineered for results

March 7, 2019

To our Shareholders,

First quarter revenue increased to \$86.0 million, compared to revenue of \$85.1 million in the first quarter of the prior year. The revenue increase primarily reflects contributions from acquisitions, which were offset by a decline in license revenue in the Interactive Management Group. Income from operating activities was \$25.8 million compared to \$24.5 million in the prior year's first quarter, an increase of 5.2%. Net income for the quarter was \$15.0 million or \$0.27 per diluted share compared to \$6.8 million or \$0.12 per diluted share in the prior year's first quarter. Last year's first quarter included a one-time charge of U.S. \$6.2 million to reflect the impact of United States Tax Reform.

Adjusted EBITDA for the first quarter was \$26.3 million or \$0.48 per diluted share, compared to \$25.3 million or \$0.46 per diluted share last year, with the increase being attributable to contributions from acquisitions and operating cost synergies.

Operating expenses before special charges related to restructuring of acquired operations were \$33.0 million compared to \$33.9 million in the prior year's first quarter and reflect incremental operating costs related to acquisitions, net of operating cost synergies. Non-cash amortization charges on acquired software and customer relationships from acquired operations were \$7.1 million for the quarter compared to \$7.2 million in the prior year's first quarter.

The Company generated cash flows from operating activities of \$24.2 million compared to \$23.1 million in the first quarter of fiscal 2018, a 4.5% increase. As a result, Enghouse closed the quarter with \$190.5 million in cash, cash equivalents and short-term investments, compared to \$193.9 million at October 31, 2018. The cash balance was achieved after payments of \$4.9 million for cash dividends and \$22.4 million (net of cash acquired) for acquisitions concluded in the current fiscal year and \$1.1 million for acquisitions closed in prior years.

On December 21, 2018 the Company declared a stock dividend payable on the basis of one common share for each common share held as at January 22, 2019, which was paid on January 25, 2019. This dividend doubled the number of shares outstanding to 54,638,024 as at January 31, 2019 and effectively achieved a two-for-one stock split. Today, the Board of Directors approved a 22% increase to the Company's eligible quarterly dividend from \$0.09 per common share to \$0.11 per common share, payable on May 31, 2019 to shareholders of record at the close of business on May 17, 2019. Enghouse has now increased its dividend in each of the past eleven years, by over 10% each year.

Stephen J. Sadler  
Chairman of the Board and Chief Executive Officer

**MANAGEMENT'S DISCUSSION AND ANALYSIS**

The following Management Discussion and Analysis ("MD&A") has been prepared as of March 7, 2019 and all information contained herein is current as of that date unless otherwise indicated. For a complete understanding of our business environment, risks, trends and uncertainties and the effect of critical accounting policies and estimates on our results, this MD&A should be read in conjunction with Enghouse Systems Limited's ("Enghouse Systems") and its subsidiaries (together "the Company" or "Enghouse") fiscal 2018 audited consolidated financial statements and the notes thereto. This MD&A covers the consolidated interim results of operations, financial condition and cash flows of Enghouse Systems and its subsidiaries, all wholly owned, for the first quarter ended January 31, 2019. Unless otherwise noted, the results reported herein have been prepared in accordance with International Financial Reporting Standards ("IFRS") and are presented in Canadian dollars, stated in thousands, except per share amounts and as otherwise indicated.

This document is intended to assist the reader in better understanding operations and key financial results as of the date of this report. The condensed consolidated interim financial statements and the MD&A have been reviewed by the Company's Audit Committee and approved by its Board of Directors.

**Non-IFRS measures**

The Company uses non-IFRS measures to assess its operating performance. Securities regulations require that companies caution readers that earnings and other measures adjusted to a basis other than IFRS do not have standardized meanings and are unlikely to be comparable to similar measures used by other companies. Accordingly, they should not be considered in isolation. The Company uses Adjusted EBITDA as a measure of operating performance. Therefore, Adjusted EBITDA may not be comparable to similar measures presented by other issuers. Adjusted EBITDA is calculated based on results from operating activities adjusted for depreciation of property, plant and equipment and special charges for acquisition related restructuring costs. Management uses Adjusted EBITDA to evaluate operating performance as it excludes amortization of software and intangibles (which is an accounting allocation of the cost of software and intangible assets arising on acquisition), any impact of finance and tax related activities, asset depreciation, foreign exchange gains and losses, and other income and restructuring costs primarily related to acquisitions.

**Forward-looking statements**

Certain statements made or incorporated by reference in this MD&A are forward-looking and relate to, among other things, anticipated financial performance, business prospects, strategies, regulatory developments, new services, market forces, commitments and technological developments. By its nature, such forward-looking information is subject to various risks and uncertainties, including those discussed in this MD&A or in documents incorporated by reference in this MD&A, such as Enghouse's Annual Information Form, which could cause the Company's actual results and experience to differ materially from the anticipated results or other expectations expressed herein. Readers are cautioned not to place undue reliance on this forward-looking information, and the Company shall have no obligation to update publicly or revise any forward-looking information, whether as a result of new information, future events or otherwise, except in accordance with applicable securities laws. This report should be viewed in conjunction with the Company's other publicly available filings.

For additional information with respect to certain of these risks or factors, reference should be made to section "Risks and Uncertainties" of the MD&A and notes to the consolidated financial statements for the year ended October 31, 2018, as well as to the Company's continuous disclosure materials filed from time to time with Canadian securities regulatory authorities, copies of which are filed electronically on SEDAR at [www.sedar.com](http://www.sedar.com).

**Corporate overview**

Enghouse is a Canadian publicly traded company (TSX:ENGH) that develops enterprise software solutions for a number of vertical markets. The Company is organized around two business segments: the Interactive Management Group and the Asset Management Group. The Interactive Management Group specializes in customer interaction software and services that are designed to enhance customer service, increase efficiency and manage customer communications across the enterprise. Core technologies include contact center, attendant console, interactive voice response, dialers, agent performance optimization and analytics that support any telephony environment, and may be deployed on-premise or in the cloud. Its customers are varied and include insurance companies, telecoms, banks and utilities as well as technology, health care and hospitality companies. The Asset Management Group provides a portfolio of products to telecom service providers, utilities and the oil and gas industry. Its products include Operations Support Systems (OSS), Business Support Systems (BSS), Mobile Value Added Services (VAS) solutions as well as data conversion services. The Asset Management Group also provides fleet routing, dispatch, scheduling, communications and emergency control center solutions for the transportation, government, first responders, distribution and security sectors.

The Company continues to focus on building a consistently profitable enterprise software company with a diversified product suite and global market presence. The Company emphasizes the importance of recurring revenue streams to increase shareholder value and the predictability of its operating results. The objective is to achieve this through a combination of organic growth and acquisitions. While the Company continues to develop and enhance its existing product portfolio, it is also important to augment and expedite this strategy with new and complementary technology, products and services obtained through acquisition. This dual-faceted approach will enable the Company to provide a broader spectrum of products and services to its customer base more quickly than through organic means alone.

**First quarter overview**

During the first quarter the Company completed two acquisitions shortly after year end. On November 8, 2018 Enghouse acquired 100% of the issued and outstanding common shares of Telexis Solutions B.V. and Telexis B.V. ("Telexis"). Headquartered near The Hague, Netherlands, Telexis is an innovative technology provider offering public transport agencies/operators end-to-end e-ticketing solutions. On November 9, 2018, Enghouse acquired 100% of the issued and outstanding common shares of Capana Sweden AB. Headquartered in Gothenburg, Sweden, Capana provides an end-to-end, integrated software platform for wholesale billing and partner settlements for the telecommunications market.

The acquisitions were completed for an aggregate purchase price of approximately \$29.9 million, with \$0.6 million subject to hold-back and adjustment, and \$5.5 million held in escrow that is subject to adjustment. Contingent consideration payable of \$0.8 million has been recorded in the Condensed Consolidated Interim Statements of Financial Position at January 31, 2019. Results are included in the Asset Management Group from the dates of acquisition.

On January 25, 2019, the Company completed a share split whereby each issued and outstanding common share has been effectively doubled. All references in the MD&A and accompanying financial statements to capital stock, options and per share data have been adjusted retrospectively to reflect the Company's two for one share split for the periods ended January 31, 2019 and 2018.

**Quarterly results of operations**

The following table sets forth certain unaudited information for each of the eight most recent quarters (the last of which ended January 31, 2019). Historically, the Company's operating results have fluctuated on a quarterly basis, which the Company expects will continue in the future. Fluctuations in results continue to relate to the timing of software license and hardware sales, which may result in large sales orders in any one quarter, movements in foreign currency exchange rates and to the timing of acquisitions, staffing and infrastructure changes. See "Risks and Uncertainties" for more details.

<b>Adjusted EBITDA per diluted share</b>	<b>\$ 0.48</b>	<b>\$ 0.46</b>

**Revenue**

Total revenue for the quarter was \$86.0 million compared to \$85.1 million in the prior year's first quarter, a 1% increase over the prior year. The increase primarily reflects contributions from acquisitions, which were offset by a decline in license revenue in the Interactive Management Group. Revenue includes hosted and maintenance services revenue of \$50.8 million compared to \$46.3 million in the first quarter last year, an increase of 9.7%. The increase is attributable to incremental contributions from acquisitions and increased hosted revenue, which increased by \$2.3 million to \$10.6 million in the quarter. This also includes maintenance revenue of \$40.2 million compared to \$37.8 million in the prior year's first quarter and reflects incremental maintenance revenue from license sales in the past fiscal year as well as contributions from acquired operations. License revenue was \$18.7 million in the quarter compared to \$22.1 million in the prior year's first quarter as a result of weaker license orders primarily in the Company's Interactive Management Group. The positive impact of foreign exchange on revenue in the current quarter compared to the prior year was estimated at \$0.9 million. IFRS 15 will introduce more volatility into the Company's revenue as the new standard requires up-front recognition of revenue on certain term license arrangements that were previously recognized over time under the previous revenue standard, IAS 18.

The Interactive Management Group contributed \$43.5 million in revenue in the quarter, compared to \$48.4 million reported in the first quarter of fiscal 2018. The Asset Management Group contributed revenue of \$42.6 million in the quarter, compared to \$36.7 million reported in the first quarter of fiscal 2018. The increase in the Asset Management Group is attributable to incremental revenue contributions from acquisitions while the decrease in the Interactive Management group is primarily related to weaker license sales in the quarter.

Revenue was positively impacted by all major currencies except the Swedish kronor, with the stronger U.S. dollar having the most impact with an offsetting negative impact on operating costs. The impact was nominal as a result of the marginally stronger euro and pound sterling compared to the Canadian dollar.

**Direct costs**

Direct costs for the quarter were \$27.2 million or 31.6% of revenue compared to \$26.6 million or 31.3% of revenue in the prior year's first quarter. This reflects higher hardware costs on proportionately higher contributions from hardware revenue in the product mix. Otherwise, both license and services costs as a percentage of revenue were lower in the quarter. Direct costs for services include costs for both hosted and maintenance services as well as professional services.

On a segment basis, direct costs in the quarter for the Interactive Management Group were \$11.3 million or 25.9% of revenue compared to \$13.0 million or 26.8% of revenue in the prior year's first quarter. Direct

costs for the Asset Management Group were \$15.9 million or 37.4% of revenue compared to \$13.7 million or 37.2% of revenue in the prior year's first quarter. The direct costs margin percentage in the Asset Management Group is relatively flat year over year reflecting improved margins on services, which mitigated weaker software and hardware margins. Margins in the Interactive Management Group were slightly better in the first quarter as a result of hardware and software margin improvements. Overall, the lower overall margins in the Asset Management Group compared to the Interactive Management Group reflect higher relative contributions from lower margin professional and hosted services in the Asset Management Group product mix.

**Revenue, net of direct costs**

Revenue net of direct costs increased to \$58.8 million, or 68.4% of revenue, compared to \$58.4 million, or 68.7% of revenue, in the prior year's first quarter. The increase in revenue, net of direct costs is primarily attributable to incremental contributions from acquisitions and improved margins on services and third party software in the quarter compared to prior year's first quarter.

**Operating expenses**

Operating expenses for the quarter were \$33.0 million, compared to \$33.9 million reported in the first quarter of last year. Operating expenses include incremental operating costs related to acquired operations over the past year as well as the negative impact of translating foreign currency denominated operating expenses to Canadian dollars in the quarter compared to the prior quarter estimated at \$0.7 million.

The Company incurred nominal acquisition related restructuring charges in the first quarter related to Telexis and Capana that were offset by the release of costs related to prior acquisitions, compared to \$0.1 million in special charges related to acquisitions in the prior year's first quarter. Excluding special charges, operating expenses were 38.4% of revenue in the current quarter compared to 39.7% in prior year's first quarter, primarily attributable to the incremental costs of acquired operations, which were offset by cost synergies and reduced headcount in traditional operations.

The Company continues to invest in R&D and recorded expenses of \$12.1 million, or 14.0%, as a percentage of revenue, in the quarter compared to \$11.7 million, or 13.7%, in the prior year's first quarter.

Non-cash charges for amortization of acquired software and customer relationships related to acquisitions were \$7.1 million, down from the prior year's first quarter expense of \$7.2 million as a result of expiring amortization charges from previous acquisitions, which offset amortization from new acquisitions.

**Foreign exchange**

The Company continues to earn a significant portion of its revenue from sales denominated in currencies other than the Canadian dollar. Due to the global nature of the Company's operations, the Company transacts a significant portion of its business in foreign countries with its revenue and costs denominated in a number of currencies including the U.S. dollar, pound sterling, euro, Swedish, Norwegian and Danish krona, as well as currencies in the Asia Pacific region. This affects both operating segments as each has significant operations in the U.S. Nordics, U.K. and Europe. The chart below outlines the movement in the currencies against the Canadian dollar on a quarterly basis.

Exchange rate source: Bank of Canada Currency Rates

During the first quarter, the Canadian dollar weakened most against the U.S. dollar, while also weakening against most other world currencies to a much lesser extent. The Canadian dollar marginally strengthened against the Swedish krona and Australian dollar compared to the first quarter of last year. As the Company's reporting currency is the Canadian dollar, overall there was a positive impact to revenue reported in Canadian dollars and a negative impact to operating costs, which partially acts as a natural hedge. Overall, revenue was positively impacted by an estimated \$0.9 million, while the impact on costs was negative, increasing costs by an estimated \$0.7 million, as calculated by applying the change in the average exchange rates from Q1/18 to Q1/19 to the Company's foreign currency denominated revenue and operating expenses in the first quarter of fiscal 2019.

The Company does not hedge foreign currency exposure but funds its U.S. dollar operating expenses with U.S. dollar revenue in order to mitigate exposure. A similar natural hedge exists for the Company's U.K., European and Scandinavian operations. Fluctuations in exchange rates among the Canadian dollar, U.S. dollar, pound sterling, Swedish krona, euro and other currencies may have a material but mitigating effect on the Company's foreign currency denominated revenue and expenses stated in Canadian dollars. This will also impact the relative cost of foreign currency denominated acquisitions stated in Canadian dollars.

The Company recorded foreign exchange losses of \$0.1 million related to the revaluation of foreign currency denominated monetary assets and liabilities in the current year's first quarter, compared to losses of \$2.5 million in the prior year's first quarter. The loss recorded reflects the impact of the weaker Canadian dollar at quarter end compared to exchange rates to convert foreign currencies to Canadian dollars at October 31, 2018. The Company reports foreign exchange gains and losses below the results from operating activities in its Condensed Consolidated Interim Statements of Operations and Comprehensive Income. Translation gains or losses recognized upon consolidation of the Company's foreign operation's financial statements into Canadian dollars are included in the Company's accumulated other comprehensive income (loss) account on the Condensed Consolidated Interim Statements of Financial Position.

**Finance and other income**

During the quarter, the Company recognized finance income of \$0.5 million and nominal other income compared to \$0.1 million in finance income and \$0.7 million in other income in the first quarter of fiscal 2018. The increase in finance income reflects improved yields on invested cash in the quarter. The decrease in other income compared to last year reflects both realized gains on the sale of equities as well as unrealized gains and losses related to recording the Company's investment in equity positions at fair value.

**Income tax expense**

During the quarter, the Company recorded a tax expense of \$4.1 million (21.5% effective tax rate) as compared to a tax expense of \$8.8 million (56.3% effective tax rate) in the prior year's first quarter, which included a one-time charge of U.S. \$6.2 million related to repatriation tax charges levied under U.S. Tax Reform regulations. The Company paid \$4.4 million in tax installments in the quarter, including U.S. \$0.5 million for the first installment of repatriation tax charges, compared to \$3.0 million in the prior year's first quarter.

**Net income**

Net income was \$15.0 million, or \$0.27 per share on a diluted basis, in the quarter compared to \$6.8 million, or \$0.12 per share on a diluted basis, in the first quarter of fiscal 2018. The increase is attributable to revenue contributions from acquisitions as well as operating cost synergies. As noted, the previous year's net income was negatively impacted by the provision for the one-time repatriation tax charge of U.S. \$6.2 million booked in the first quarter.

**Liquidity and capital resources:**

The Company closed the quarter with cash and short-term investments of \$190.5 million, compared to the October 31, 2018 balance of \$193.9 million due to continued collection efforts. This is net of payment of \$4.9 million for dividends and \$22.4 million for acquisitions concluded in the quarter, net of cash received. The Company also paid \$1.1 million related to acquisitions concluded in prior periods. The Company continues to have sufficient cash resources to fund both its current and future financial operating commitments as well as its dividend strategy. During the first quarter, the Company generated cash flow from operating activities of \$24.2 million compared to \$23.1 million in the first quarter of 2018.

The Company declared a stock dividend on December 21, 2018, payable on the basis of one common share for each common share held as at January 22, 2019, which was paid on January 25, 2019. This dividend doubled the number of common shares outstanding to 54,638,024 as at January 31, 2019 and effectively achieved a two-for-one share split.

During the first quarter, 58,000 stock options were exercised contributing \$0.7 million in cash compared to 70,400 stock options and \$0.7 million in cash to the Company in the prior year's first quarter. The Company did not grant options in the first quarter of 2019 (Q1/2018 – 240,000). Enghouse did not repurchase any shares of its common stock in either year's third quarter under its Normal Course Issuer Bid, whereby it may repurchase up to a maximum of 3,878,742 common shares of the Company.

**Off-Statement of Financial Position arrangements**

The Company has not entered into off-statement of financial position financing arrangements. Except for operating leases and other low probability and/or immeasurable contingencies (not accrued in accordance with IFRS), all material commitments are reflected on the Company's Condensed Consolidated Interim Statements of Financial Position.

**Transactions with related parties**

The Company has not entered into any transactions with related parties during the period, other than transactions between wholly owned subsidiaries and the Company in the normal course of business, which are eliminated on consolidation.

**Basis of preparation and significant accounting policies**

These unaudited condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34, *Interim Financial Reporting* ("IAS 34") as issued by the International Accounting Standards Board ("IASB"). The financial statements reflect the accounting policies

disclosed in Note 3 of the Company's 2018 annual consolidated financial statements except as disclosed herein. They have been prepared on a going concern basis, using historical cost, except for investments in equity securities designated at fair value through profit or loss, certain assets and liabilities initially recognized in connection with business combinations, and derivative financial instruments, which are measured at fair value.

The policies applied in these unaudited condensed consolidated interim financial statements are based on IFRS issued and outstanding as of March 7, 2019. Any subsequent changes to IFRS that are applied retroactively in the Company's annual consolidated financial statements for the year ending October 31, 2018 could result in changes to these unaudited condensed consolidated interim financial statements.

### **New standards and interpretations adopted**

#### **IFRS 9, *Financial instruments* ("IFRS 9")**

IFRS 9 addresses the classification, measurement and recognition of financial assets and financial liabilities. It replaces the parts of IAS 39, *Financial Instruments: Recognition and Measurement* ("IAS 39") that relate to the classification and measurement of financial instruments. IFRS 9 requires financial assets to be classified into three measurement categories at fair value, amortized cost or fair value through other comprehensive income ("FVOCI") for certain financial assets that are debt instruments. For financial liabilities, the standard retains most of the IAS 39 requirements.

Under IFRS 9, gains and losses on re-measurement of financial assets measured at fair value will be recognized in profit or loss, except that for an investment in an equity instrument, which is not held-for-trading. IFRS 9 provides, on initial recognition, an irrevocable election to present all fair value changes from the investment in other comprehensive income ("FVOCI"). The election is available on an individual share-by-share basis. Unlike IAS 39, amounts presented in OCI will not be reclassified to profit or loss at a later date.

Further changes to the classification and measurement rules introduced a new impairment model, which include a new expected credit loss ("ECL") model that involves a three-stage approach whereby financial assets move through the three stages as their credit quality changes. On initial recognition, entities will record a day one loss equal to the 12 month ECL (or lifetime ECL for trade receivables), unless the assets are considered credit impaired. IFRS 9 requires a forward-looking ECL impairment model as opposed to an incurred credit loss model under IAS 39. As the Company's financial assets include significant trade receivables, the Company has opted to use the simplified approach for measuring the loss allowance at an amount equal to lifetime ECL recorded in day one. No transition adjustment on adoption of IFRS 9 was booked for this by the Company.

The Company adopted IFRS 9 on November 1, 2018 on a modified retrospective basis in accordance with the transitional provisions. As such, comparative figures have not been restated. Upon adoption, all investments in equity instruments have been measured at fair value through profit or loss ("FVPL"). These investments are recorded at fair value and changes in the fair value are recognized in other income in the Condensed Consolidated Interim Statements of Operations and Comprehensive Income.

The Company recorded a transition adjustment on November 1, 2018 to reduce opening retained earnings and increase accumulated other comprehensive income by \$0.8 million on adoption of IFRS 9 to reflect the impact of recording short-term investments (equities) at FVPL.

#### **IFRS 15, *Revenue from Contracts with Customers* ("IFRS 15")**

IFRS 15 contains a single model for revenue recognition that applies to contracts with customers. The model features a contract-based five-step analysis of transactions to determine whether, how much and when revenue should be recognized. The new standard also provides guidance on whether revenue should be recognized over time or at a point in time as well as requirements for more informative disclosures. The Company has adopted IFRS 15, effective November 1, 2018, using the cumulative effect method. Under the cumulative effect method, the Company has recognized the cumulative effect of initially applying IFRS 15 as an adjustment to the opening balance of retained earnings as at November 1, 2018. Therefore, the comparative information has not been restated and continues to be reported under IAS 18, *Revenue* ("IAS 18").

The details of the primary changes on adoption of IFRS 15 are set out below:

- Term-based licenses – Under previous accounting policies, license revenue on certain term-based licenses was recognized ratably over the contract term. Under IFRS 15, the Company has deemed the licenses to be generally distinct from other performance obligations. Revenue allocated to the distinct license is recognized at the time the license is delivered to the customer, other than for those term-based licenses provided on a variable usage basis. Term license revenue provided on a fixed fee basis, subject to monthly or annual minimum fees, is recognized at the time that both the right to use the software has commenced and the software has been made available to the customer. Term license revenue provided on a variable usage basis, such as the number of transactions, subscribers or other variable measure, is recognized over time based on a customer's utilization in a given period.
- Capitalization of costs to acquire contracts – Under previous accounting policies, the Company generally expensed incremental commission costs as they were earned by employees. Under IFRS 15, the Company capitalizes and amortizes commission costs that relate to contracts of more than one year on a systematic basis, consistent with the pattern of transfer of the goods or services over which the commission costs relate. For commissions allocated to term-based license arrangements and post-contract customer support, the amortization period is expected to be over the term of the contract. Capitalized costs to obtain a contract are included in other non-current assets on the Condensed Consolidated Interim Statements of Financial Position. The Company did not record any transition adjustment for capitalized costs to acquire contracts as they were not significant.

On adoption of IFRS 15, the Company recorded an adjustment to increase unbilled accounts receivable on November 1, 2018 by \$2.2 million with a corresponding adjustment to increase opening accumulated retained earnings by \$1.7 million (net of deferred income tax). The transition adjustment related to term-based software license revenue that would have been recognized at a point in time under IFRS 15, which were previously recognized over time under IAS 18.

Had the Company presented the results for the three months ended January 31, 2019 under IAS 18, the software license revenue and net income would have decreased by \$0.7 million and \$0.5 million, respectively, while the deferred income tax liability would have decreased by \$0.2 million and unbilled receivables would have decreased by \$0.7 million.

As part of its adoption of IFRS 15, the Company has reclassified certain amounts previously reported under IAS 18 as software license revenue to hosted and maintenance revenue. As a result, software license revenue has decreased by \$14.7 million for the year ended 2018 and by \$3.7 million for the quarter ended January 31, 2018, and the hosted and maintenance services revenue has increased by an equivalent amount during the same periods. This re-classification issue had no impact on the prior period net income and retained earnings.

The adoption of IFRS 15 had no impact to cash from or used in operating, financing, or investing activities on the Company's Condensed Consolidated Interim Statements of Cash Flows.

### **Risks and uncertainties**

The primary risks and uncertainties that affect or may affect the Company and its business, financial condition, and results of operations remain substantially unchanged from those discussed in the Company's latest Annual Information Form and its Management's Discussion and Analysis of Financial Condition and Results of Operations for the year ended October 31, 2018, contained in the Company's 2018 Annual Report to Shareholders and all such risks and uncertainties are incorporated herein by reference.

### **Controls and procedures**

In compliance with the Canadian Securities Administrators' National Instrument 52-109 ("NI 52-109"), the Company has filed with applicable Canadian securities regulatory authorities, certificates signed by its Chief Executive Officer ("CEO") and Vice President Finance in capacity as Chief Financial Officer ("CFO") that, among other things, report on the design and effectiveness of disclosure controls and procedures and the design of internal controls over financial reporting.

**Disclosure controls and procedures**

Disclosure controls and procedures have been designed under the supervision of the CEO and CFO, with the participation of other management, to provide reasonable assurance that all relevant information required to be disclosed by the Company is recorded, processed, summarized and reported on a timely basis to senior management, as appropriate, to allow timely decisions regarding required public disclosure. Pursuant to NI 52-109, as of October 31, 2018, an evaluation of the effectiveness of the Company's disclosure controls and procedures was carried out under the supervision of the CEO and CFO. Based on this evaluation, the CEO and the CFO concluded that the design and operation of these disclosure controls and procedures were effective. This evaluation considered the Company's disclosure policy, a sub-certification process and the functioning of the Company's Disclosure Committee.

**Internal controls over financial reporting**

The Company's CEO and CFO are responsible for designing internal controls over financial reporting or causing them to be designed under their supervision to provide reasonable assurance regarding the reliability of the Company's financial reporting and the preparation of financial statements in accordance with IFRS.

As at October 31, 2018, an evaluation was carried out of the effectiveness of the design and operation of internal controls over financial reporting to provide reasonable assurance regarding the reliability of financial reporting. Based on that evaluation, the Company's CEO and CFO have concluded that, as at October 31, 2018, the design and operation of controls over financial reporting was effective. These evaluations were conducted in accordance with the standards established in "Internal Control – Integrated Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission", and the requirements of NI 52-109. The control framework used by the CEO and the CFO to design the Company's internal control over financial reporting is the "Internal Control – Integrated Framework (2013)" published by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

There were no changes to the Company's internal control over financial reporting during the quarter ended January 31, 2019 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

**Additional information**

Additional information relating to the Company including our most recently completed Annual Information Form ("AIF") is available on SEDAR at [www.sedar.com](http://www.sedar.com) and on the Company's website at [www.enghouse.com](http://www.enghouse.com).

**Notice of no auditor review of interim financial statements**

The accompanying unaudited condensed consolidated interim financial statements of the Company for the three months ended January 31, 2019 have been prepared by and are the responsibility of the Company's management.

The Company's independent auditor has not performed a review of these financial statements in accordance with standards established by the Canadian Institute of Chartered Accountants for a review of the interim financial statements by an entity's auditor.

**Notes to Condensed Consolidated Interim Financial Statements****For the three months ended January 31, 2019 and 2018***(Unaudited, in thousands of Canadian dollars, except as indicated)***1. Description of the business and reporting entity**

Enghouse Systems Limited (“Enghouse Systems”) and its wholly owned subsidiaries (together the “Company” or “Enghouse”) develop enterprise software solutions for a number of vertical markets. The Company is organized around two business segments: the Interactive Management Group and the Asset Management Group. The Interactive Management Group specializes in customer interaction software and services that are designed to enhance customer service, increase efficiency and manage customer communications across the enterprise. The Asset Management Group provides products and services to telecom service providers as well as fleet management and public safety software solutions to transportation, government, first responders, distribution, security, utilities and oil and gas industries. Enghouse Systems is incorporated and domiciled in Canada. The address of its registered office is 80 Tiverton Court, Suite 800, Markham, Ontario, L3R 0G4. The Company has offices around the world including the United States, the United Kingdom, Sweden, Norway, Denmark, Belgium, Brazil, Germany, Ireland, Australia, New Zealand, Israel, Lebanon, Romania, Italy, Spain, Colombia and Croatia.

**2. Basis of preparation****(a) Statement of compliance**

These unaudited condensed consolidated interim financial statements have been prepared in accordance with IAS 34, *Interim Financial Reporting* (“IAS 34”). The unaudited condensed consolidated interim financial statements should be read in conjunction with the annual consolidated financial statements for the year ended October 31, 2018, which have been prepared in accordance with International Financial Reporting Standards (“IFRS”). These unaudited condensed consolidated interim financial statements were approved by the Audit Committee of the Board of Directors for issue on March 7, 2019.

**(b) Basis of preparation and measurement**

These unaudited condensed consolidated interim financial statements have been prepared in accordance with IAS 34 as issued by the International Accounting Standards Board (“IASB”). The financial statements reflect the accounting policies disclosed in Note 3 of the Company’s 2018 annual consolidated financial statements except as disclosed herein. They have been prepared on a going concern basis, using historical cost, except for investments in equity securities designated at fair value through profit or loss, certain assets and liabilities initially recognized in connection with business combinations, and derivative financial instruments, which are measured at fair value.

The policies applied in these unaudited condensed consolidated interim financial statements are based on IFRS issued and outstanding as of March 7, 2019. Any subsequent changes to IFRS that are applied retroactively in the Company’s annual consolidated financial statements for the year ended October 31, 2019 could result in changes to these unaudited condensed consolidated interim financial statements.

**(c) Functional and presentation currency**

The Company’s subsidiaries generally operate in their local currency environment. Accordingly, items included in the financial statements of each legal entity consolidated within the Enghouse group are measured using the currency of the primary economic environment in which the legal entity operates (the “functional currency”). The condensed consolidated interim financial statements are presented in Canadian dollars, which is also Enghouse Systems’ functional currency.

**(d) Use of estimates and judgments**

The preparation of the unaudited condensed consolidated interim financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates. In preparing these unaudited condensed consolidated interim financial statements, the significant judgments made by management and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements for the year ended October 31, 2018.

**Notes to Condensed Consolidated Interim Financial Statements****For the three months ended January 31, 2019 and 2018***(Unaudited, in thousands of Canadian dollars, except as indicated)***3. Significant accounting policies**

Except for the adoption of IFRS 15 and IFRS 9 at November 1, 2018, the accounting policies adopted are consistent with those of the previous financial year.

**Revenue recognition**

Revenue represents the amount the Company expects to receive for products and services in its contracts with customers, net of discounts and sales taxes. The Company accounts for customer contracts when it secures written approval in the form of a signed contract, the parties are committed to the contract with the rights of the parties, including payment terms, specifically identified, the contract has commercial substance and the consideration is probable of collection. The timing of revenue recognition often differs from contract payment schedules and milestones, resulting in revenue that has been earned but not billed. These amounts are included as accounts receivable. Amounts billed in accordance with customer contracts, but in advance of revenue being recognized, are classified as deferred revenue.

**Arrangements with multi-performance obligations**

The Company typically contracts with customers to deliver more than one of the goods and services noted below as part of a single arrangement. The Company exercises significant judgment to evaluate these arrangements to determine whether the goods or services are considered distinct performance obligations that should be accounted for separately from some or all of the other goods or services in the arrangement. A good or service is distinct if the customer can benefit from it on its own or together with other readily available resources and the Company's promise to transfer the good or service is separately identifiable from other promises in the contract. Goods and services that are not distinct are combined with other goods and services until they are distinct as a bundle and can be accounted for as a single performance obligation. Where a contract consists of more than one performance obligation, revenue is allocated to each based on their estimated relative standalone selling price ("SSP").

**Standalone selling price**

The SSP reflects the price Enghouse charges for a specific good or service if it was sold separately to similar customers in similar circumstances. This is typically determined using observable data and is based on a narrow range of prices or rates established from historical analysis. This range is subject to periodic review and assessment when material changes in facts and circumstances warrant it.

**Allocation of transaction price**

In bundled arrangements where there is more than one distinct performance obligation, the transaction price is allocated to each performance obligation based on its relative SSP. However, the SSP may not be directly observable in all bundled transactions. In bundled transactions with license and customer maintenance, the Company allocates the transaction price between license and maintenance using the residual approach as it has determined the SSP for certain goods and services in these arrangements is highly variable. The Company uses this residual approach only for its license arrangements.

**Nature of goods and services**

Revenue consists primarily of fees for licenses of the Company's software, subscriptions, hosted and maintenance services, professional services and hardware revenue.

**License revenue**

The Company sells on-premise software licenses on both a perpetual and specified-term basis. Perpetual licenses provide customers the right to use the software for an indefinite period of time in exchange for a one-time license fee, generally paid at contract inception. Term licenses provide the customer with the right to use software for a specified period in exchange for a fee, which may be paid at contract inception or paid in installments over the period of the contract. Revenue from the licensing of software on a perpetual basis is recognized at the time that both the right to use the software has commenced and the software has been made available to the customer for download at the commencement of the term. Term license revenue provided on a fixed fee basis, subject to monthly or annual minimum fees, is recognized at the time that both the right to use the software has commenced and the software has been made available to the customer. Term license revenue provided on a variable usage basis, such as the number of transactions,

**Notes to Condensed Consolidated Interim Financial Statements**

**For the three months ended January 31, 2019 and 2018**

*(Unaudited, in thousands of Canadian dollars, except as indicated)*

subscribers or other variable measure, is recognized over time based on a customer's utilization in a given period. The Company also sells third-party software as an added service to customers. This revenue is generally recognized on delivery to the customer on the same terms and basis as the Company provides its own proprietary software to customers.

Hardware revenue

Hardware is sold to customers as an added service to complement the Company's software offering. This revenue is generally recognized on delivery to the customer when the Company has transferred control of the hardware to the buyer under the terms of an enforceable contract.

Hosted and maintenance services revenue

In the Company's hosted/SaaS arrangements, the end user generally does not take possession of the software and the software application resides on the Company's hardware or that of a third party with the customer obtaining the right to access the software. Hosted solutions and services are provided on a usage basis, which can vary depending on the number of users or subscribers, and is recognized based on a customer's utilization of the services over the term of the arrangement.

Maintenance revenue consists of primarily of technical support and the provision of unspecified upgrades and updates made on a when-and-if-available basis. This support is related to the Company's perpetual and term-based on-premise license arrangements. Maintenance is not critical to the customer's ability to derive benefit from its right to use the Company's software and is considered a distinct performance obligation when sold together with licenses in a bundled transaction.

The amount of the selling price associated with hosted and maintenance services revenue agreements is deferred and recognized as revenue over the period during which the services are performed. This deferred revenue is included on the Condensed Consolidated Interim Statements of Financial Position as a current liability to the extent the services are to be delivered in the next twelve months. Set-up fees on hosted services revenue are deferred and recognized on a straight-line basis over the estimated life of the customer relationship period.

Professional services revenue

Professional services revenue includes installation, implementation, configuration, consulting and training services provided as a bundle along with software licenses or on a standalone basis. Payment for professional services is either on a fixed-fee or time and materials basis. As the Company's professional services do not significantly alter the functionality of the license and its customers can benefit from its professional services on their own or together with other readily available resources, professional services are considered as distinct within the context of the contract. Professional services revenue is recognized as delivered, typically on an input-based measure of progress such as total labour hours incurred versus total expected labour hours. As a practical expedient, revenue is recognized for the amount that customers are invoiced when this reflects the amount that corresponds directly to the value to the customer of the performance to date against the contract.

Performance obligations

A summary of the Company's typical performance obligations and when the obligations are satisfied is as follows:

<b>Performance obligation</b>	<b>When performance obligation is satisfied</b>
Software license revenue Perpetual licenses Term licenses – fixed fee basis Term licenses – variable and usage basis	When software is made available for download (point in time) When software is made available for download (point in time) Based on customer utilization (over time)
Hosted and maintenance services revenue Hosted revenue Maintenance revenue	Ratable over course of the service term (over time) Ratable over course of the service term (over time)
Professional service revenue	As the services are delivered (over time)
Hardware revenue	As control of the hardware transferred (point in time)

**Notes to Condensed Consolidated Interim Financial Statements**

**For the three months ended January 31, 2019 and 2018**

*(Unaudited, in thousands of Canadian dollars, except as indicated)*

**New standards and interpretations adopted**

***IFRS 9, Financial Instruments* (“IFRS 9”)**

IFRS 9 addresses the classification, measurement and recognition of financial assets and financial liabilities. IFRS 9 replaces the parts of *IAS 39, Financial Instruments: Recognition and Measurement* (“IAS 39”) that relate to the classification and measurement of financial instruments. IFRS 9 requires financial assets to be classified into three measurement categories:

- Financial assets measured at fair value through profit or loss
- Financial assets measured at amortized cost
- Fair value through other comprehensive income for certain financial assets that are debt instruments

The determination is made at initial recognition. The classification depends on the entity’s business model for managing its financial instruments and the contractual cash flow characteristics of the instrument. For financial liabilities, the standard retains most of the IAS 39 requirements.

Under IFRS 9, gains and losses on re-measurement of financial assets measured at fair value will be recognized in profit or loss, except that for an investment in an equity instrument, which is not held-for-trading. IFRS 9 allows, on initial recognition, an irrevocable election to present all fair value changes from the investment in other comprehensive income (“FVOCI”). The election is available on an individual share-by-share basis. Unlike IAS 39, amounts presented in OCI will not be reclassified to profit or loss at a later date. IFRS 9 also includes a new general hedge accounting standard, which will align hedge accounting more closely with risk management. The Company does not have any designated hedges in place.

Further changes to the classification and measurement rules introduced a new impairment model, which includes a new expected credit loss (“ECL”) model that involves a three-stage approach whereby financial assets move through the three stages as their credit quality changes. The stage dictates how an entity measures impairment losses and applies the effective interest rate method. A simplified approach is permitted for financial assets that do not have a significant financing component (i.e. trade receivables). On initial recognition, entities will record a day one loss equal to the 12 month ECL (or lifetime ECL for trade receivables), unless the assets are considered credit impaired. IFRS 9 requires a forward-looking ECL impairment model as opposed to an incurred credit loss model under IAS 39. As the Company’s financial assets include significant trade receivables, the Company has opted to use the simplified approach for measuring the loss allowance at an amount equal to lifetime ECL recorded on day one. No transition adjustment on adoption of IFRS 9 was booked for this by the Company.

A summary of the Company’s classification and measurement of financial assets under IAS 39 and IFRS 9 is as follows:

<b>Financial assets</b>	<b>Under IAS 39</b>	<b>Under IFRS 9</b>
Cash and cash equivalents	Fair value through profit or loss	Fair value through profit or loss
Short-term investments - equities	Available-for-sale	Fair value through profit or loss
Accounts receivable	Amortized cost	Amortized cost

The Company adopted IFRS 9 on November 1, 2018 on a modified retrospective basis in accordance with the transitional provisions of IFRS 9. As such, comparative figures have not been restated. The adoption of IFRS 9 had a nominal impact on the Company’s disclosures. Upon adoption, all investments in equity instruments have been measured at fair value through profit or loss (“FVPL”). These investments are recorded at fair value and changes in the fair value are recognized in other income in the Condensed Consolidated Interim Statements of Operations and Comprehensive Income.

The Company recorded a transition adjustment on November 1, 2018 to reduce opening retained earnings and increase accumulated other comprehensive income by \$0.8 million on adoption of IFRS 9 to reflect the impact of recording short-term investments (equities) at FVPL.

**Notes to Condensed Consolidated Interim Financial Statements**

**For the three months ended January 31, 2019 and 2018**

*(Unaudited, in thousands of Canadian dollars, except as indicated)*

***IFRS 15, Revenue from Contracts with Customers (“IFRS 15”)***

The Company adopted IFRS 15, with an initial adoption date of November 1, 2018. The Company utilized the cumulative effect method to adopt the new standard. Accordingly, the results for reporting periods commencing on November 1, 2018 are presented under the new standard while the comparative information has not been restated and continues to be reported under the previous standard. See note 4 below for further details.

**New Standards and interpretations issued but not yet applied**

***IFRS 16, Leases (“IFRS 16”)***

IFRS 16 is a new standard effective for fiscal years beginning on or after January 1, 2019. The standard replaces current guidance under *IAS 17, Leases* (“IAS 17”) and no longer distinguishes between a finance lease and an operating lease for lessees. Instead, for virtually all lease contracts the lessee recognizes a lease liability reflecting future lease payments and a “right-of-use” asset. Lessor accounting remains somewhat similar as under IAS 17. The Company intends to adopt IFRS 16 in its financial statements for the annual period beginning on November 1, 2019. The extent of the impact of adoption of the standard has not yet been determined.

**4. Explanation of adoption of IFRS 15**

IFRS 15 contains a single model for revenue recognition that applies to contracts with customers. The model features a contract-based five-step analysis of transactions to determine whether, how much and when revenue should be recognized. The new standard also provides guidance on whether revenue should be recognized over time or at a point in time as well as requirements for more informative disclosures. The Company has adopted IFRS 15, effective November 1, 2018, using the cumulative effect method. Under the cumulative effect method, the Company has recognized the cumulative effect of initially applying IFRS 15 as an adjustment to the opening balance of retained earnings as at November 1, 2018. Therefore, the comparative information has not been restated and continues to be reported under *IAS 18, Revenue* (“IAS 18”)

The details of the primary changes on adoption of IFRS 15 are set out below:

- Term-based licenses – Under previous accounting policies, license revenue on certain term-based licenses was recognized ratably over the contract term. Under IFRS 15, the Company has deemed the licenses to be generally distinct from other performance obligations. Revenue allocated to the distinct license is recognized at the time the license is delivered to the customer, other than for those term-based licenses provided on a variable usage basis. Term license revenue provided on a fixed fee basis, subject to monthly or annual minimum fees, is recognized at the time that both the right to use the software has commenced and the software has been made available to the customer. Term license revenue provided on a variable usage basis, such as the number of transactions, subscribers or other variable measure, is recognized over time based on a customer’s utilization in a given period.
- Capitalization of costs to acquire contracts – Under previous accounting policies, the Company generally expensed incremental commission costs as they were earned by employees. Under IFRS 15, the Company capitalizes and amortizes commission costs that relate to contracts of more than one year on a systematic basis, consistent with the pattern of transfer of the goods or services over which the commission costs relate. For commissions allocated to term-based license arrangements and post-contract customer support, the amortization period is expected to be over the term of the contract. Capitalized costs to obtain a contract are included in other non-current assets on the Condensed Consolidated Interim Statements of Financial Position. The Company did not record any transition adjustment for capitalized costs to acquire contracts as they were not significant.

The Company recorded an adjustment to increase unbilled receivables on November 1, 2018 by \$2.2 million with a corresponding adjustment to increase opening accumulated retained earnings by \$1.7 million (net of deferred income tax). The transition adjustment related to term-based software license revenue that

**Notes to Condensed Consolidated Interim Financial Statements**

**For the three months ended January 31, 2019 and 2018**

*(Unaudited, in thousands of Canadian dollars, except as indicated)*

would have been recognized at a point in time under IFRS 15, which was previously recognized over time under IAS 18.

Had the Company presented the results for the three months ended January 31, 2019 under IAS 18, the software license revenue and net income would have decreased by \$0.7 million and \$0.5 million, respectively, while the deferred income tax liability would have decreased by \$0.2 million and unbilled receivables would have decreased by \$0.7 million.

As part of its adoption of IFRS 15, the Company has reclassified certain amounts previously reported under IAS 18 as software license revenue to hosted and maintenance revenue. As a result, software license revenue has decreased by \$14.7 million for the year ended 2018 and by \$3.7 million for the quarter ended January 31, 2018, and the hosted and maintenance services revenue has increased by an equivalent amount during the same periods. This re-classification issue had no impact on the prior period net income and retained earnings.

The adoption of IFRS 15 had no impact to cash from or used in operating, financing, or investing activities on the Company's Condensed Consolidated Interim Statements of Cash Flows.

**5. Intangible assets and goodwill**

**For the three months ended January 31, 2019 and 2018**

*(Unaudited, in thousands of Canadian dollars, except as indicated)*

**6. Provisions**

Provisions include provisions for onerous contracts, legal claims, restructuring and special charges, and are measured based on management's best estimate of the expenditure required to settle the obligation at the end of the reporting period.

	<b>Total</b>
<b>At November 1, 2018</b>	<b>\$ 268</b>
Additional provisions	82
Unused amounts reversed	(218)
Effect of movements in foreign exchange	9
	<hr/>
<b>At January 31, 2019</b>	<b>\$ 141</b>
	<hr/>

**7. Share capital and other components of shareholders' equity**

**Capital stock**

The authorized share capital of the Company consists of an unlimited number of common shares with no par value, an unlimited amount of Class A, redeemable, retractable, non-voting, non-cumulative, preference shares and an unlimited number of Class B, redeemable, retractable, non-voting, preference shares. There were 54,638,024 common shares outstanding as at January 31, 2019. There were no Class A and no Class B preference shares issued and outstanding as at either October 31, 2018 or January 31, 2019.

**Common share repurchase plan**

On April 26, 2018, the Company renewed its common share repurchase plan, whereby it may repurchase up to a maximum of 3,878,742 common shares of the Company, expiring on April 29, 2019. The Company did not repurchase any common shares in either fiscal 2019 or fiscal 2018.

**Accumulated other comprehensive income**

Accumulated other comprehensive income comprises the following separate components of equity:

	Translation of foreign operations \$	Unrealized gains/losses \$	Total \$
<b>At October 31, 2017</b>	<b>8,555</b>	<b>(68)</b>	<b>8,487</b>

<b>At January 31, 2019</b>	<b>9,423</b>	<b>-</b>	<b>9,423</b>

**Notes to Condensed Consolidated Interim Financial Statements**

**For the three months ended January 31, 2019 and 2018**

*(Unaudited, in thousands of Canadian dollars, except as indicated)*

**Dividends**

During the three months ended January 31, 2019, the Company declared and paid dividends of \$0.09 and \$0.09, respectively, per common share (three months ended January 31, 2018 - \$0.08 and \$0.08 per common share, respectively).

**Stock dividend**

The Company declared a stock dividend on December 21, 2018, payable on the basis of one common share for each common share held as at January 22, 2019, which was paid on January 25, 2019. The dividend doubled the number of common shares outstanding and effectively achieved a two-for-one stock split. The Company ascribed no monetary value to the stock dividend. The number of shares outstanding and options exercised and outstanding, the option exercise prices, dividends per share and the basic and diluted earnings per share figures have been restated retroactively to reflect the stock dividend.

**8. Stock-based compensation**

The Company has granted options to purchase common shares to certain directors, officers and employees of the Company, pursuant to the terms of the Company's stock option plan (the "Plan"). The Plan provides that a total of 2,718,900 (January 31, 2018 – 2,706,500) common shares are reserved for options and that the shares reserved for options, which could become exercisable in any one year, will not exceed more than 10% of the issued and outstanding common shares of the Company at the time such options may be exercisable. These options vest at various times over four years and expire seven years after the grant date. The exercise price of each option equals the market price of the Company's stock on the date the options are granted.

A summary of the status of the Company's Plan as at January 31, 2019 and January 31, 2018, and changes during the three months ended respectively on those dates is presented as follows:

	January 31, 2019		January 31, 2018	
	Number of options	Weighted average exercise price in \$	Number of options	Weighted average exercise price in \$
Outstanding at beginning of period	1,440,900	25.13	1,840,500	19.52
Granted	-	-	240,000	29.90
Exercised	(58,000)	12.41	(70,400)	10.57
Outstanding at end of period	<b>1,382,900</b>	<b>25.66</b>	<b>2,010,100</b>	<b>21.07</b>
Options exercisable at end of period	<b>513,900</b>	<b>19.61</b>	<b>894,100</b>	<b>12.33</b>

The Company uses the fair value method for recording compensation expense related to equity instruments awarded to employees, officers and directors in accordance with *IFRS 2, Share-based Payments*. For the purposes of expensing stock options, each tranche in an award is considered a separate award with its own vesting period and grant date fair value. Compensation expense is recognized over the tranche's vesting period by increasing contributed surplus based on the number of awards expected to vest. The Company recorded a non-cash charge of \$408 in the first quarter (Q1/2018 - \$399).

For options granted in the period, the fair value of each stock option on the date of the grant was estimated using the Black-Scholes option pricing model as set out below. Estimated volatility is calculated on a daily basis using historical closing prices, as adjusted for certain events that management deemed to be non-recurring and non-indicative of future events over a five-year period, which reflects the expected life of the options.

**Notes to Condensed Consolidated Interim Financial Statements**

**For the three months ended January 31, 2019 and 2018**

*(Unaudited, in thousands of Canadian dollars, except as indicated)*

	<b>Options Granted Q1/2019</b>	<b>Options Granted Q1/2018</b>
Risk-free interest rate (%)	Nil	1.77%
Estimated volatility (%)	Nil	27% – 28%
Dividend yield	Nil	\$0.32
Expected life (in years)	Nil	3.5
Weighted average fair value (in dollars)	Nil	\$6.20
Weighted average share price at grant date	Nil	\$29.90

There were no options granted in the three months ended January 31, 2019 (Q1/2018 - 240,000).

**9. Income tax**

Income tax expense is recognized based on management’s best estimate of the estimated annual income tax rate expected for the full financial year applied to the pre-tax income for the interim period for each entity in the consolidated group. As a result of foreign exchange fluctuations, acquisitions and the relative mix of income earned in differing jurisdictions, the Company has determined that a reasonable estimate of a weighted average annual tax rate cannot be determined for the consolidated group.

On December 22, 2017, *The United States Tax Cuts and Jobs Act* (“U.S. Tax Reform”) was enacted in the U.S. While this decreased the Company’s tax rate going forward, there were significant one-time charges that adversely impacted the Company’s tax provision booked in the first quarter of fiscal 2018. The significant changes included: (i) the revaluation of deferred tax assets and liabilities on the reduction in the federal corporate income tax rate from 35% to 21% effective January 1, 2018; and (ii) the deemed repatriation of earnings and profits of specified foreign corporations effective December 31, 2017. This resulted in an estimated one-time repatriation tax charge of U.S. \$6.2 million that was recorded in the first quarter of fiscal 2018. The repatriation tax is payable over eight years at a rate of 8% for each of the first five years and increasing thereafter on a graduated basis. The Company continues to assess the impact of U.S. Tax Reform and may make changes in estimates based on interpretations and assumptions as they become available.

For the quarter, the Company recorded a tax expense of \$4.1 million (or 21.5% effective tax rate) as compared to a tax expense of \$8.8 million (56.3%) in the prior year’s first quarter.

**10. Earnings per share**

**Basic:** Basic earnings per share is calculated by dividing the net income attributable to owners of the parent by the weighted average number of common shares issued and outstanding during the period.

	<b>Three months ended January 31</b>	
	<b>2019</b>	<b>2018</b>
Net income attributable to owners of the parent	\$ 14,964	\$ 6,813
Weighted average number of common shares issued	54,597	54,028
<b>Basic earnings per share</b>	<b>\$ 0.27</b>	<b>\$ 0.13</b>

**Diluted:** Diluted earnings per share is calculated by adjusting the weighted average number of common shares issued and outstanding to assumed conversions of all potential dilutive common shares. The Company only has stock options as a potential dilutive to common shares. For stock options, a calculation is done to determine the number of shares that could have been acquired at fair value (determined as the average market share price of the Company’s outstanding shares for the period) based on the monetary

**Notes to Condensed Consolidated Interim Financial Statements**

**For the three months ended January 31, 2019 and 2018**

*(Unaudited, in thousands of Canadian dollars, except as indicated)*

value of the subscription rights attached to the stock options. The number of shares calculated above is compared to the number of shares that would have been issued assuming the exercise of the stock options.

	<b>Three months ended</b>	
	<b>January 31</b>	
	<b>2019</b>	<b>2018</b>
Net income attributable to owners of the parent	\$ 14,964	\$ 6,813
Weighted average number of common shares issued	54,597	54,028
Adjustments for:		
Stock options	364	578
Weighted average number of common shares for diluted earnings per share	<u>54,961</u>	<u>54,606</u>
<b>Diluted earnings per share</b>	<b><u>\$ 0.27</u></b>	<b><u>\$ 0.12</u></b>

**11. Acquisitions**

Acquisitions have been recorded under the acquisition method of accounting and results have been included in the Condensed Consolidated Interim Statements of Operations and Comprehensive Income from their respective acquisition dates. Accordingly, the allocation of the purchase price to assets and liabilities is based on the fair value, with the excess of the purchase price over the fair value of the assets acquired being allocated to goodwill.

**2019 acquisitions**

***Asset Management Group***

The Company acquired 100% of the issued and outstanding common shares of Telexis Solutions B.V. and Telexis B.V. on November 8, 2018. Headquartered near The Hague, Netherlands, Telexis Solutions is an innovative technology provider offering public transport agencies/operators end-to-end e-ticketing solutions. It includes automated fare collection, sales and services, value-added services, inspection and corresponding back office solutions. On November 9, 2018, Enghouse acquired 100% of the issued and outstanding common shares of Capana Sweden AB. Headquartered in Gothenburg, Sweden, Capana provides an end-to-end, integrated software platform for wholesale billing and partner settlements. Its revenue management solutions are used by communication service providers and companies active within the Internet of Things industry.

The acquisitions were completed for an aggregate purchase price of approximately \$29.9 million, with \$0.6 million subject to hold-back and adjustment, and \$5.5 million held in escrow that is subject to adjustment. Contingent consideration payable of \$0.8 million has been recorded in the Condensed Consolidated Interim Statements of Financial Position at January 31, 2019.

**2018 acquisitions**

***Asset Management Group***

The Company completed three acquisitions in the first two quarters of the fiscal year, acquiring 100% of the issued and outstanding common shares or assets for an aggregate purchase price of approximately \$11.6 million. During the first quarter of fiscal 2019, \$0.6 million was paid to the sellers in respect of hold-backs, with \$1.2 million held in escrow that is subject to further adjustment.

**Notes to Condensed Consolidated Interim Financial Statements**  
**For the three months ended January 31, 2019 and 2018**  
*(Unaudited, in thousands of Canadian dollars, except as indicated)*

The Company's purchase price allocations are as follows:

	<b>Asset Management Group Preliminary 2019</b>	<b>Asset Management Group Preliminary 2018</b>
Cash and cash equivalents	\$ 6,139	\$ 1,235
Accounts receivable, net	2,685	2,182

Property, plant and equipment	1	205
Deferred income tax assets	209	146
Acquired software	13,061	4,785
Customer relationships	4,795	3,765
Goodwill	11,275	4,513
<b>Total assets acquired</b>	<b>\$ 41,671</b>	<b>\$ 17,409</b>
Less: Current liabilities assumed	\$ 7,540	\$ 3,931
Less: Deferred income tax liabilities	4,236	1,888
<b>Total liabilities assumed</b>	<b>\$ 11,776</b>	<b>\$ 5,819</b>
<b>Net assets acquired for cash consideration</b>	<b>\$ 29,895</b>	<b>\$ 11,590</b>

**12. Segment information**

The Company has two operating segments, the Interactive Management Group and the Asset Management Group, based on the nature of the operations and markets that each of these segments serves. The accounting policies followed by these segments are the same as those described in the summary of significant accounting policies.

The Company's operating segments each develop and market software products and provide services for their respective markets and are inclusive of the current year acquisitions. The Interactive Management Group specializes in customer interaction software and services that are designed to enhance customer service, increase efficiency and manage customer communications across the enterprise. The Asset Management Group provides a portfolio of products to telecom service providers as well as fleet management and public safety software solutions for the transportation sector, government, first responders, distribution, security, utilities and oil and gas industries. The Company evaluates segment performance based on revenue and profit or loss before income taxes.

**13. Litigation and contingencies**

**General**

The Company provides its customers with a qualified indemnity against the infringement of third party intellectual property rights. From time to time, various owners of patents and copyrighted works send the Company or its customers letters alleging that the Company's products do or might infringe upon the owner's intellectual property rights, and/or suggesting that the Company or its customers should negotiate a license agreement with the owner. The Company's policy is to never knowingly infringe upon any third party's intellectual property rights. Accordingly, where appropriate, the Company forwards any such allegation or licensing request to its outside legal counsel for review. The Company generally attempts to resolve any such matter by informing the owner of the Company's position concerning non-infringement or invalidity. Even though the Company attempts to resolve these matters without litigation, it is always possible that the owner of a patent or copyrighted work will sue the Company.

In response to correspondence from and, in a few instances, litigation instigated by, third-party patent holders, a few of the Company's customers have attempted to tender to the Company the defense of its products under contractual indemnity provisions. With respect to this litigation, and any other litigation the Company becomes involved with, under a contractual indemnity or any other legal theory, the Company has and will continue to consider all its options for resolution and vigorously assert all appropriate defenses. There are no material claims outstanding against the Company as at January 31, 2019.

**14. Changes in non-cash operating working capital**

	Three months ended January 31,

Increase in deferred revenue	11,245	6,673
	<b>\$ 1,423</b>	<b>\$ 2,913</b>

**15. Subsequent event**

On February 14, 2019, the Company acquired 100% of the issued and outstanding common shares of ProOpti AB ("ProOpti"). Headquartered in Stockholm, Sweden, ProOpti is a leading Nordic software provider in the telecom expense management and technology optimization management sectors. Its solutions include the complete management of telecom expenses, mobile UC charges for voice, data and services as well as IT enterprise asset management, usage and contract optimization. Its products can be deployed in the cloud or on-premise with telecom service providers. The acquisition was completed for an aggregate purchase price of approximately \$3.3 million, subject to hold-back and adjustment, with results to be included in the Asset Management Group from the date of acquisition. The purchase price allocation has not been established subject to receipt of additional information.
