## Enghouse Acquires UK-based Gamma Projects

**Markham, Ontario, and Wales, United Kingdom, April 1, 2008** – Enghouse Systems Limited (TSX: ESL) announced today that it has acquired Gamma Projects Ltd. of Wales, in the United Kingdom.

Gamma Projects provides network infrastructure management software solutions (collectively known as Gamma NetOne) and consultancy services for telecommunications operators and equipment vendors. Gamma's NetOne software product is an integrated suite of software that enables telecommunication companies to streamline the complex processes of planning, implementing, operating and optimizing mobile network infrastructures.

"Gamma Projects is a natural fit as it provides our Asset Management Division (AMD) with a complementary telecom solution to our current NetWORKS product offering. This gives us a new footprint and an expanded geographical presence in the growing mobile market," commented Anthony R. Pearlman, President of the Enghouse AMD.

### About Enghouse

Enghouse is a leading global provider of enterprise software solutions serving a variety of distinct vertical markets. Its strategy is to build a larger and more diverse software company through strategic acquisitions and managed growth. Enghouse shares are listed on the Toronto Stock Exchange under the symbol "ESL". Further information about Enghouse may be obtained from the Company's web site at [www.enghouse.com](http://www.enghouse.com).
