
Enhouse Systems Acquires Tollgrade Communications

Acquisition broadens portfolio of solutions for service providers

Markham, Ontario – April 12, 2017 – Enhouse Systems Limited (TSX:ENGH) announced today it has acquired Tollgrade Communications, Inc. for a purchase price of approximately \$23.0 million, subject to certain price adjustments. Tollgrade’s annual revenue is approximately \$24.0 million.

Headquartered in Cranberry, Pennsylvania, Tollgrade is a leading provider of centralized, software based test systems for broadband telecom access providers. The company’s test systems are sold to communication service providers (CSPs), enabling them to remotely assess network reliability and performance, accelerate revenue for new services, minimize onsite service calls and improve overall subscriber satisfaction.

The Tollgrade test system consists of a centralized software platform that collects and analyzes measurement data from the company’s test heads and third party products deployed throughout the network. CSPs use this integrated system to run network tests. These tests are done either proactively for preventative maintenance or reactively to detect, locate and remove faults.

“The Tollgrade solution is an excellent addition to our OSS Service Assurance portfolio. It enables Enhouse to offer service providers the ability to reduce costs, increase profitability, assure network reliability and improve service quality,” said Sunil Diaz, General Manager, Enhouse Networks Group. “This enables a core strategy for service providers evolving to next-generation broadband over fiber and 5G access networks. We are pleased to welcome Tollgrade’s employees, customers and partners.”

The acquisition also adds a number of new global tier-1 and 2 customers in the U.S. and Europe. This enables Enhouse to position an expanding portfolio of OSS, BSS and Network Valued Added Services and strengthens relationships within an existing common customer base.

“We are delighted that Tollgrade is joining forces with Enhouse Networks,” said Edward H. Kennedy, CEO of Tollgrade. “Together, Enhouse and Tollgrade will bring a wider portfolio of products and solutions to the market, benefiting our combined base of CSP customers.”

About Enhouse
